

Napersoft zCCM BatchMerge 5.2 for Batch Document Creation

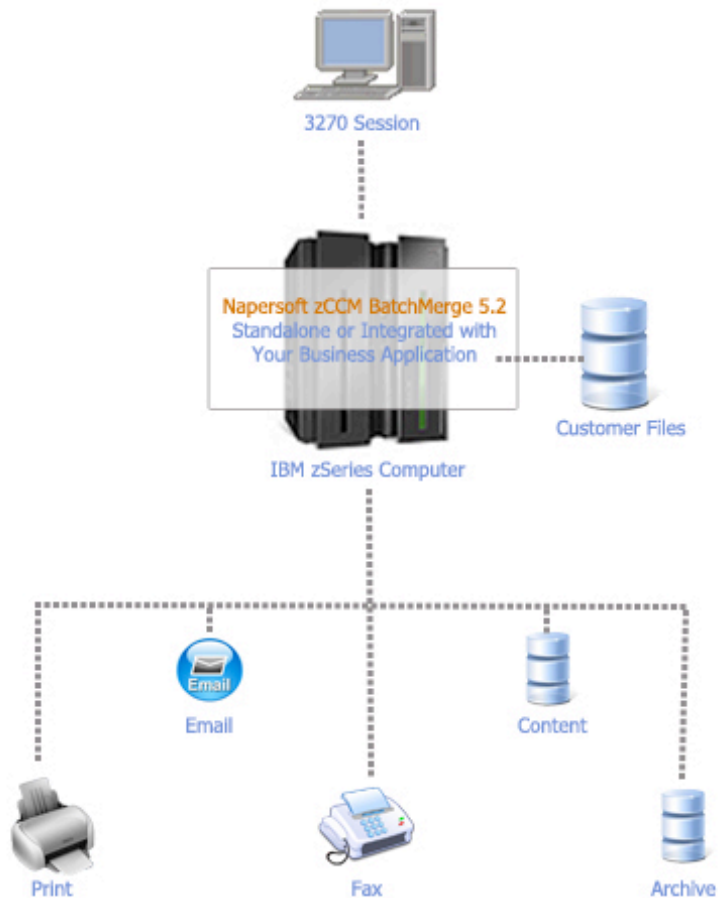

Key Benefits

- Streamlines the creation and distribution of batch oriented customer communications
- Provides access to customer data across your organization
- Automatically inserts customer data into forms
- Ensures personalized customer communications
- Can be run on a stand-alone basis or called from your batch application programs
- Selection criteria and file definitions can be defined via control records, user exits or your calling application program
- File maintenance options to copy, move, delete, recover and paginate content

Overview

Napersoft BatchMerge 5.2 is a world-class batch customer communications management engine for the enterprise. It streamlines the retrieval of customer information from databases, the assembly and personalization of content and the distribution of customer communications.

BatchMerge personalizes data from any SAM, VSAM or DBMS file with Napersoft Word forms. You can create and distribute personalized documents, letters, statements, notices, envelopes and other business forms.

Napersoft zCCM BatchMerge 5.2 for Batch Document Creation

Key Functionalities

Functionality Overview

Napersoft zCCM BatchMerge 5.2 can be run on a stand-alone basis or called from your batch application program. Selection criteria and file definitions can be defined via control records, user exits or your calling application program.

zCCM products operate on IBM z/OS Versions 1.1 to 1.11 (and above) zSeries mainframe and plug-compatible computers. On-line products also require CICS Transaction Server for z/OS Versions 1.3 to 4.3 (and above). All mainframe environments require an IBM 3270 or plug-compatible personal computer, printer, disk and a magnetic tape unit. Content libraries are stored in VSAM files.

Can be installed by the customer or by Napersoft Professional Services staff on a fee basis.

Software (cartridge or tape) includes:

- Object code
- Sample JCL
- Sample control cards
- Sample user exits

Documentation includes:

- Napersoft zCCM BatchMerge 5.2 for z/OS Programming Guide
- Napersoft for z/OS Installation Guide

Printers Supported:

Napersoft zDemand360 products output the major print streams that work with laser, impact, ink-jet and other on-line and batch printers, including:

- AFPDS using PSF Release 2.0 and above
- PCL
- DJDE
- Line Print

In addition, a customizable printer driver technology is available to support any print stream required.

Napersoft zCCM BatchMerge 5.2 for z/OS requires the following product:
