

Napersoft zCCM Bridge 5.2 for Business Process Workflow Automation

Key Benefits

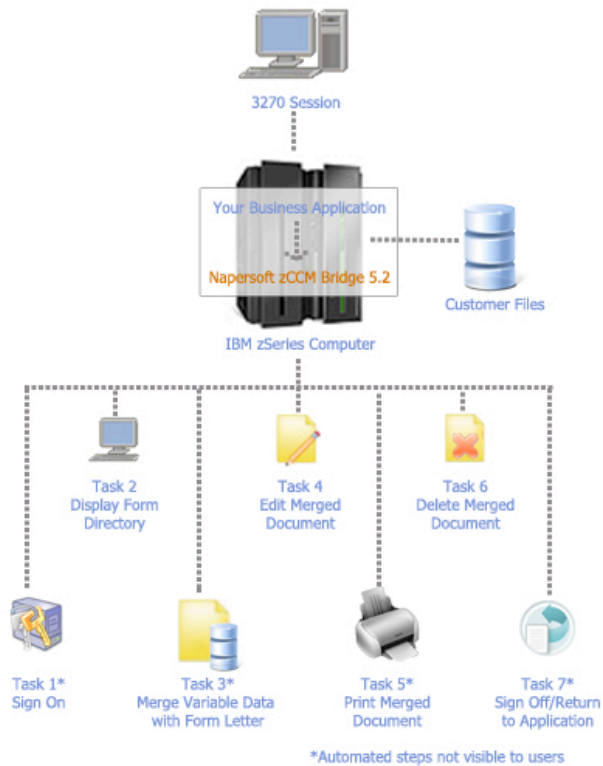

- Creates personalized customer communications from within your business applications
- Automates an entire work process with only a few keystrokes
- Eliminates embarrassing and costly errors
- Provides immediate and personalized customer communications
- Up to 9,999 CICS application interfaces
- 16 steps per workflow with the ability to chain workflows
- Table definitions of interfaces
- Tables for startup, default and return data

Overview

Napersoft Bridge 5.2 is a customer communications management business process manager for creating, distributing and archiving personalized documents for the enterprise. It helps increase user productivity, eliminate costly steps and errors and provide faster, more personalized customer service through its powerful customer communications management capabilities.

Napersoft Bridge integrates your business applications running on your IBM® z/OS or plug-compatible zSeries mainframe computer with the Napersoft zCCM family of customer communications management products. It provides the capability to link or call a series of customer communications management tasks from your business applications simply by depressing a PF "hot" key.

User training is simplified because work processes can be automated and reduced to a few keystrokes.

Napersoft zCCM Bridge 5.2 for Business Process Workflow Automation

Key Functionalities

- Define up to 9,999 different application interfaces; each has 16 definable steps and workflow chaining
- Macro definitions of application interfaces
 - Tables for startup, default and return data
 - Up to 4,096 input/output fields per application that can be overridden for each task, including form letter, name, address and other data
- Easy application interface test procedure from terminal
- CICS call support
 - START
 - XCTL
 - LINK
- CICS storage interface support
 - Main memory (COMAREA)
 - Transient data
 - Temporary storage (main and auxiliary)
- User exit support

Functionality Overview

zCCM products operate on IBM z/OS Versions 1.1 to 1.11 (and above) zSeries mainframe and plug-compatible computers. On-line products also require CICS Transaction Server for z/OS Versions 1.3 to 4.3 (and above). All mainframe environments require an IBM 3270 or plug-compatible personal computer, printer, disk and a magnetic tape unit. Content libraries are stored in VSAM files.

Can be installed by the customer or by Napersoft Professional Services staff on a fee basis.

Software (cartridge or tape) includes:

- Object code
- Sample CICS entries
- Sample application definition tables

Documentation includes:

- Napersoft zCCM Bridge 5.2 for z/OS API Programming Guide
- Napersoft zCCM Bridge 5.2 for z/OS Workflow Manager Programming Guide
- Napersoft for z/OS Installation Guide

Napersoft Bridge for z/OS works with the following products:

- Napersoft zCCM Merge 5.2 for z/OS
- Napersoft zCCM Word 5.2 for z/OS
