

Napersoft zCCM Doc 5.2 for Dynamic Documentation Management

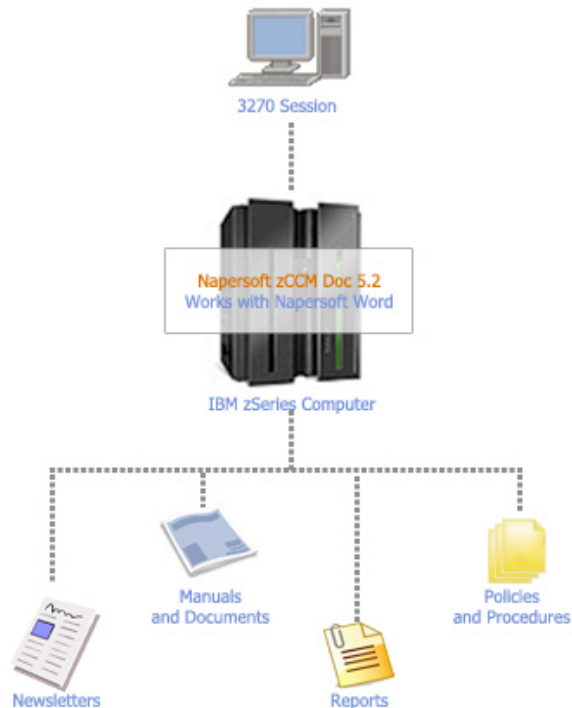

Key Benefits

- Increases user/programmer productivity when creating and maintaining documentation, manuals, books and reports
- Eliminates costly editing steps
- Provides a much faster response to changes in documentation
- Eliminates embarrassing and costly errors
- Uses a mark up language inserted within a Napersoft Word document to automatically produce quality looking documents

Overview

Napersoft Doc 5.2 is a customer communication management publishing system for the enterprise. It enhances user productivity in creating and maintaining documentation, manuals, books and reports by eliminating embarrassing errors and costly, time-consuming editing steps. The software also facilitates a much quicker response to document changes.

Napersoft Doc runs on your IBM® z/OS or plug-compatible zSeries mainframe computer with 3270 terminals and/or plug compatible personal computer.

Napersoft zCCM Doc 5.2 for Dynamic Documentation Management

Functionality Overview

Napersoft zCCM Doc 5.2 automatically produces presentation quality on demand content personalization documents, books, manuals and reports.

zCCM products operate on IBM z/OS Versions 1.1 to 1.11 (and above) zSeries mainframe and plug-compatible computers. On-line products also require CICS Transaction Server for z/OS Versions 1.3 to 4.3 (and above). All mainframe environments require an IBM 3270 or plug-compatible personal computer, printer, disk and a magnetic tape unit. Content libraries are stored in VSAM files.

Can be installed by the customer or by Napersoft Professional Services staff on a fee basis.

Software (cartridge or tape) includes:

- Object code
- Sample CICS entries

Documentation includes:

- Napersoft zCCM Word/Merge/Doc 5.2 for z/OS User Guide
- Napersoft for z/OS Installation Guide

Napersoft zCCM Doc 5.2 for z/OS requires the following product:

- Napersoft zCCM Word 5.2 for z/OS
