

Read what our customers are saying about Napersoft CCM Author

"I like the look and feel of the custom ribbon built on Microsoft® Word and the drag-and-drop feature in the Author Pane makes incorporating merge fields simple."

-Business Analyst,
Healthcare Services Company

"If you can create a Microsoft® Word document, you can create a Napersoft document template."

-Director of Development,
Life Insurance Company

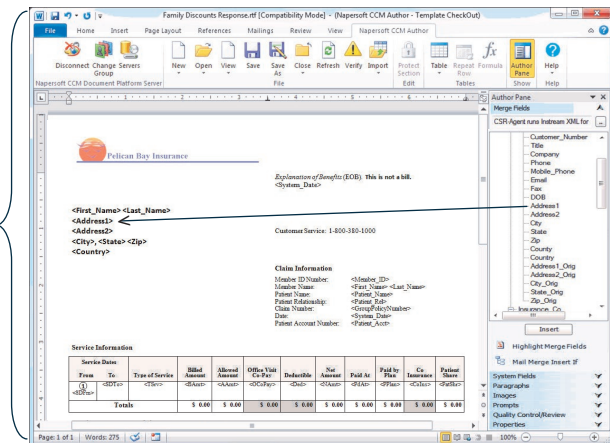

"Because of the high use of merge fields and situational-based paragraphs in our documents, we found business rules to be a very important component of the solution."

-Director of Client Services,
Professional Employer Company

Overview

Napersoft CCM Author is designed to assist business users with the template authoring process. Built on Microsoft® Word technology, Napersoft CCM Author enables business users to quickly and easily create templates. Business users can utilize the functions of Word, as well as Napersoft's custom-built components, to create document templates.

Napersoft CCM Author Interface

Author Interface
Built on Microsoft® Word

Navigation
Intuitive options and a re-designed ribbon

Author Pane
With drag-and-drop capabilities

Napersoft CCM Author's architecture utilizes drag-and-drop functionality and re-useable template objects such as paragraphs and images to reduce the time it takes to create and maintain templates.

Once a template has been created, Napersoft CCM composition engine applies business rules and merges customer data, paragraphs and images into the documents according to the template design.

Customer Document based on template design

Linked Images
Napersoft CCM links the header image so pre-printed letterhead is not necessary

Variable Data
Merged data from customer database

Repeating Rows
Napersoft CCM allows business users to define and compose repeating sections and rows and input formula definition and dynamic calculations

Dynamic or Conditional Paragraph
Napersoft CCM automatically includes pre-approved paragraphs based on variables within the data or user choice
